

Filter frame for P-10 - elliptical vertical wide angle

Item no. 83061159

Description

This magnetic filter frame is suited for P-10 or Q-10 fixtures and is part of an accessory range consisting of four different magnetic holographic filter frames.

The P-10 offers a standard 10° beam angle, which can be shaped to a 12°/63° elliptical vertical beam angle when using the elliptical vertical wide angle filter frame. Additionally, it features a safety wire to be fixed to the yoke or top handle of the fixture (or the barndoors, if such are applied). When used with Q-10, this filter frame generates an interesting stripped effect for direct view.

This filter can be combined with the barndoors for P-10 / Q-10.

Features and benefits

✓ Easy-fit magnetic filter frame

✓ Compatible with barndoors

Certifications & classifications

Specification

Physical

Color options

Black - RAL 9004
White - RAL 9010

NOTES:

Due to continuous improvements and innovations, specifications may change without notice.

LEDs' expected lifetime provided by manufacturer and obtained under manufacturer's test conditions.

Zoom range defined as a minimum beam angle to a maximum field angle.

Photometric measurements obtained with Goniometer Scan / SGM Illumination Lab 1.6.0.0.

Lumen output in pixel products is calculated.
